DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species 1 claims 1-10 in Paper No. 11/12/03 is acknowledged.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the diagrams (figures 17a and 17b) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is

requested in correcting any errors of which applicant may become aware in the specification.

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Method of making a thin film transistor having a crystallized amorphous silicon film.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamazaki et al. (US Patent 6,506,636). With regards to claims 1 and 6, Yamazaki et al.

Art Unit: 2824

disclose exposing a semiconductor film to a plasma of a gas comprising at least an inert gas ; providing the semiconductor film with a metal containing material, and crystallizing the semiconductor film by heating after providing the metal containing material, and performing a laser anneal (column 6 lines 29-60). With regards to claims 2, and 7 the semiconductor film is exposed to the plasma by using a plasma CVD apparatus (column 6 lines 29-34). With regards to claims 3 and 8 the metal containing material is Ni (column 6 lines 29-34). With regards to claims 4 and 9 disclose incorporating the semiconductor device into a video camera (embodiment 6). With regards to claims 5 and 10 the inert gas is argon (column 6 lines 29-34).

The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley K Smith whose telephone number is (703) 308-6261. The examiner can normally be reached on 10-6 Monday through Friday.
